At first I want to express my humble thanks to slavegirl_Diana for her absolutely pioneering work. A program that controls a Hitachi is a real breakthrough in self-bondage and stimulation play.

Again you need this fabulous SwitchBox to buy at: https://www.antrax.de/switchbox

I have rewritten my program Bondage_Fun. Suddenly I felt that the large variety of combinations is not quite the thing I was definitely looking for. Thus, I changed a bit and are proud to present you my final version. I gave it another name, such that you are able to download both versions.

First change: You can chose whether you want to experience a newbie session or an advanced session.

Newbie session: you can chose your minimum time. The maximum time is then twice the minimum time.

There are three newbie sessions:

1. The vibe is switched on and off randomly. The time unit for a probable switch is 30 to 120 seconds. The probability to switch is 50%.
2. The vibe is switched on for one minute and off for four minutes in the first half. In the second half on for one minute and off for three minutes.
3. The vibe is switched on and of with increasing intervals. This will drive you really silly!

Advanced session: The basic time unit to be chosen controls the length of your scenario. So be careful what you wish for. The length is at discretion of Master/Mistress.

The programs plays with: five sessions, which are subdivided into two types.

First type: same as the three newbie sessions, except that the program takes three cycles instead of two.
There is a 50% probability that it takes the basic time unit to run through, and 50% probability that this time is enhanced by Master/Mistress.
The enhancement can be: 50% probability out of the range of the basic time unit, 50% probability out of the range of twice the basic time unit.

After the first and the second cycle, there is each a 33% probability that you are done with the session.

There is also a 50% probability that the program does not tell you for how long you will have to go. Adding this gave me a real thrill.

Second type: There is an orgasm training session and an arousal training session. These two sessions are not chosen by time. A dice is rolled between one and four cycles. After each cycle there is a 33% chance for your session to be done.

Arousal training:
First cycle: tease and denial for 45 minutes, 15 minutes cool-down.
Second cycle: tease and denial for 60 minutes, 15 minutes cool-down.
Third cycle: tease and denial for 75 minutes, 15 minutes cool-down.
Fourth cycle: tease and denial for 90 minutes, 15 minutes cool-down.

Remember: how many cycles you will have is at random, maybe you have only one, maybe you have four.

At the end you are granted with a chance to orgasm, this takes 15 minutes.

Orgasm training: Basically the same as the arousal training, but: the cool-down phases are forced orgasm phases. As such, after each tease and denial phase, you are forced to orgasm for 15 minutes.

The advanced session has another new feature. There is a 10% probability that you are **not** released by the CD-tray at the end. Master/Mistress will take chance upon you and say you messed it up. As a punishment, you will have to go through the first cycle of the forced orgasm session.

This is now the program I play with. I admit, this is more a girls thing. But when the boys reduce the times appropriately, they may be able to stand it, too.

Have fun!
